AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

亡

- 1. (Original) An assembly of mouldings that can be joined together and used as a floating structure, the assembly comprising a first moulding and a second moulding each of which is produced by a rotational moulding process and has an outer face incorporating a first zone and a second zone which zones are so shaped that the first moulding can be joined to the second moulding in a first disposition in which the first zone of the first moulding is in face-to-face relationship with one of the zones of the second moulding or in a second disposition in which the second zone of the first moulding is in face-to-face relationship with one of the zones of the second moulding.
- 2. (Original) An assembly of mouldings according to claim 1, in which the mouldings include a third moulding having an outer face incorporating a first zone and a second zone which zones are so shaped that the third moulding can be joined to the second moulding in a first disposition in which the first zone of the third moulding is in face-to-face relationship with one of the zones of the second moulding or in a second disposition in which the second zone of the third moulding is in face-to-face relationship with one of the zones of the second moulding.
- 3. (Currently amended) An assembly of mouldings according to claim 1 or claim 2, in which the first zone and the second zone of each moulding comprise each a flat portion

of the outer face of the moulding, the flat portions being disposed at an angle one to the other.

- 4. (Currently amended) An assembly of mouldings according to $\frac{\text{claim 1}}{\text{any one of claims 1 to 3}}$, in which the mouldings have outer profiles that are substantially similar one to the other.
- 5. (Currently amended) An assembly of mouldings according to $\frac{\text{claim 4}}{\text{any one of claims 1 to 4}}$, in which the mouldings have substantially similar outer profiles that are of hexagonal shape.
- 6. (Currently amended) An assembly of mouldings according to Claim 1 claim any one of claims 1 to 5, in which at least one moulding has an end face that is disposed in face-to-face relationship with an end face of a fourth moulding to which said at least one moulding is joined.
- 7. (Currently amended) An assembly of mouldings according to <u>claim 1</u> any one of claims 1 to 6, in which the mouldings are of moulded plastics material.
- 8. (Currently amended) A hull-and-deck structure for a boat comprising an assembly of mouldings according to claim 1 any one of claim 1.
